

CV9-C

9 Channel Charge Amplifier

Using front panel mounted BNC inputs and outputs it provides an easy set up solution, with individual gain selection via a three pole switch, which offers the user the option of x1, x10 or X100 gain individually selectable for each channel, making is extremely flexible when used with mixed accelerometer outputs.

With a low noise floor the CV9-C is a great all round low cost per channel solution.

Features

- Short Circuit/open circuit warning Indicator.
- Switchable Gain of x1, x10 and x100 for Charge inputs, individual channel selectable.
- Front panel BNC input/output connectors.
- 19" Rack Mountable Enclosure
